EDUCATION

SENIOR SECONDARY
EDUCATION (12TH)
VIVEKANAND SCHOOL,
DELHI
2008 – 2023

HIGHER EDUCATION

B.TECH IN ARTIFICIAL
INTELLIGENCE &
MACHINE LEARNING
MAHATMA GANDHI
MISSION COLLEGE OF
ENGINEERING &
TECHNOLOGY, NOIDA
2023 – 2027

SOFT SKILLS

- Team Collaboration
- Problem Solving
- Leadership

ABOUT ME

AI/ML undergraduate specializing in building practical, real-world AI solutions.
Hands-on experience with Agentic AI, LLMs, task planning systems, and intelligent automation.
Strong interest in AI-powered web applications and productivity-focused tools.
Actively participating in hackathons, certifications, and project-based learning.

EXTRA SKILLS

- Led a team of 5 volunteers in making An AI agent in sustainable cities. That particularly tells us how to manage cleanliness in our city. Using workflow
- Completed a Machine Learning workshop by Softpro India Computer Tech Pvt. Ltd., focused on practical implementation and real-world use cases.

TECHNICAL SKILLS

- Programming Languages: Python, C++, JavaScript, HTML, CSS
- Machine Learning & AI: Basics of Machine Learning, AI Agents, LLM Integration, Task Planning Systems, Automation Workflows, Git & GitHub
- Data Management & Visualization Tools & Concepts

COURSES

PYTHON PROGRAMMING – FULL COURSE (UDEMY)

- Gained strong proficiency in Python fundamentals, data structures, functions, and object-oriented programming
- Developed problem-solving skills through hands-on exercises and mini-projects
- Applied Python in AI/ML projects and automation workflows

PROJECTS

FROM LEARNER TO BUILDER: BECOME AN AI AGENT ARCHITECT BY IBM

Jul 2025 – Aug 2025

- Designed an AI agent focused on city cleanliness and sustainability management
- Implemented workflow-based task planning and decision logic
- Led a team of 5 members

JobPilot AI – Smart Auto-Apply Bot

April 2025

- AI-powered job application bot that automatically applies to jobs on LinkedIn and Naukri.com using your resume.
- Tech Stack: Python, JavaScript, HTML, CSS, AI APIs

SentinelAI – Border Surveillance System

March 2025

- SentinelAI is an intelligent border surveillance system that combines YOLOv8 deep learning models with a real-time tactical dashboard to provide comprehensive perimeter monitoring.
- The system processes video feeds (local files or live YouTube streams), detects and tracks persons and vehicles, classifies threat levels across user-defined restricted zones, and delivers instant alerts through both desktop and mobile interfaces.

Portfolio Website (With scroll animation)

April 2025

- Built a fully animated portfolio website for my self.
 - The website includes scroll animations and interactive UI
 - Link1:- https://drive.google.com/file/d/1l_wSrH_O4Mg3h5OXtBklbsJKZbBYIJLQ/view?usp=sharing

-

ACHIEVEMENTS

AI-powered border surveillance system (Secured 1st position)

March 2025

- A full detection pipeline (YOLOv8m + ByteTrack for persistent object IDs across frames)
- Multi-zone polygon drawing directly on the live feed via HTML Canvas
- Threat scoring system - A weighted score approach which combining crowd count, loitering time, and surge rate. Each zone gets its own threat level independently.
- FastAPI backend with WebSocket streaming at 20fps (Achieved in Real-time with help of some frameskipping) to a React dashboard
- A mobile companion app served over same Network - alerts, live counts, activity graph, mode toggles from your phone
- Live source switching - YouTube streams, RTSP, local files — without restarting anything
- Link:- <https://drive.google.com/file/d/1jp2SxtPZAAfPtKRRWc3MGokzqFrpu8AL/view?usp=sharing>

VIBE-A-THON - AN AI-BASED HACKATHON (Secured 2nd Position)

Sept 2025

Secured 2nd place in Vibe-a-thon, an AI-based hackathon by Microsoft Learn Student Ambassadors, showcasing strong AI and teamwork skills.
